

Ryan Robinson

Who I am:

A web-designer and front-end developer seeking to use my technical expertise to produce creative, visually smart, and functional websites and apps

What I can do:

Technical Expertise:

HTML
CSS
CSS Frameworks
Javascript
jQuery
FTP
PHP/MySQL
UI/UX Design
Wordpress

Tools:

Dreamweaver
Photoshop
GIMP 2
Netbeans IDE
Filezilla FTP
Google Documents
Microsoft Office Suite

Project Capabilities:

Research
Copywriting
Content Creation
Idea Development
Site Organization

What I have done:

Costco Wholesale, Inc. (via The Creative Group) | September 2012 | Web Production

This project required working with a large web production team to create and maintain a large number of web pages for Costco's e-commerce website. Tools used included IBM Websphere CMS and HTML.

Questtocode.com | 2012 | Design, HTML, CSS, jQuery, PHP & MySQL

This project required implementation development of a variety of technologies to create a functioning tutorials website with features such as an animated navigation bar, Auto update of HTML elements without page load, and user comment sections

Split-the-bill | 2012 | Design, HTML, CSS, jQuery

This project required the use of media-queries for correct formatting for mobile and non-mobile devices, as well as multiple Javascript functions to power the app.

My Education:

Western Washington University - Graduation March 2012

English Literature Emphasis - 3.4 GPA

Studies included: analog circuits, logic, and technical writing
